FIELD NOTES
OF THE
DEPENDENT RESURVEY OF

A PORTION OF THE SUBDIVISIONAL LINES

AND

THE SUBDIVISION OF SECTIONS 8 AND 9,

TOWNSHIP 19 SOUTH, RANGE 16 EAST

Of the Gila and Salt River Meridian,
In the State of Arizona

EXECUTED BY
Stephen K. Hansen Cadastral Surveyor

Under Special Instructions dated and approved September 30, 1996, and Supplemental Special Instructions dated and approved March 6, 1997, which provided for the surveys included under Group Number 807, and assignment instructions dated September 30, 1996.

Survey Commenced October 7, 1996
Survey Completed March 31, 1997

pp. 36-48

T. 19 S., R. 16 E., Gila and Salt River Meridian, Arizona

CHAINS

The following field notes describe the dependent resurvey of a portion of the subdivisional lines and the subdivision of sections 8 and 9, Township 19 South, Range 16 East, Gila and Salt River Meridian, Arizona.

Theo F. White surveyed the exterior boundaries and the subdivisional lines in 1874. Philip Contzen dependently resurveyed the north boundary in 1904. Clyde J. King dependently resurveyed a portion of the south boundary in 1993.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions dated September 30, 1996, and the Supplemental Special Instructions dated March 6, 1997, for Group No. 807, Arizona.

The directions of all lines were determined by direct hour angle observations on the sun, and refer to the true meridian. Distances and angles were measured with a Sokkia Set II B2 total station instrument.

The geographic position of the corner of sections 3, 4, 33 and 34, on the south boundary of the township, was determined by the technique of static differential positioning using Ashtech models M-XII and MS-XII geodetic units. U.S. Coast and Geodetic Survey triangulation station "GREAT 1936" was used as the control station. The position is as follows.

Latitude: 31°43'53.42" N. Longitude: 110°42'20.01" W. NAD27

The mean magnetic declination, as taken from quadrangle map SONOITA, ARIZ., published in 1958, and photorevised in 1983, by U.S. Geological Survey, is 12° E.

Dependent Resurvey of a Portion of the Subdivisional Lines,

There are sycamore and cottonwood trees in the lower and wetter regions.</p>

T. 19 S., R. 16 E., Gila and Salt River Meridian, Arizona

CHAINS

There are numerous full time residents in the area. The mix of vocations includes full time ranchers as well as hobbyists.

Although there was a considerable amount of mining activity in the past, no current mineral activity was noted.

CERTIFICATE OF SURVEY

I, Stephen K. Hansen, Cadastral Surveyor, HEREBY CERTIFY upon honor that, in pursuance of Special Instructions bearing date of the 30th day of September, 1996, and Supplemental Special Instructions bearing date of the 6th day of March, 1997, I have dependently resurveyed a portion of the subdivisional lines, and subdivided sections 8 and 9 of Township 19 South, Range 16 East, of the Gila and Salt River Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.
